

AST Ascentia PS Marketing

It's a desktop, it's a notebook, it's... both. New Intel® mobile Pentium® III processors add the power and performance of the desktop to the convenience of the notebook. A big bright screen, dazzling performance and the ability to work whenever and wherever you want make the Ascentia PS a tremendous investment in technology and productivity.

High-end Performance

Featuring the Intel mobile Pentium III processor, the Ascentia PS delivers graphically rich interactive presentations, smooth playing video and processing power to go. Your ability to deliver your business message to clients at their site will enhance your reputation and help win you business!

Manageability

Constant Computing and built-in support for Wired for Management contribute to secure and efficient system management. With the Ascentia PS, you get the power and networking capability of an entire office — in your lap.

Built for You

AST's comprehensive Build-to-Order model allows you to specifically customize the Ascentia PS to your business needs. And if you're a frequent flier, add in that DVD-ROM so you can play your own choice of movies!
